

Mga ipapacheck kay sir Jiro

Dine In - progress since September 12, 2026

Since our last progress checking, we improved Casual Dining and its tutorial and multiplayer flow, then built out the Fast Food restaurant and started its cooking gameplay.

September 13-19

- We added offline-first cloud campaign saving and connected the menu wallet to our local campaign money.
- We improved the Management Computer UI for PC and mobile and polished the Casual Dining tutorial.
- We fixed multiplayer service flow, task tracking, day-start synchronization, and shared UI.
- We adjusted customer arrival, stockout patience, and hygiene pacing, and started Fast Food development.

September 20-26

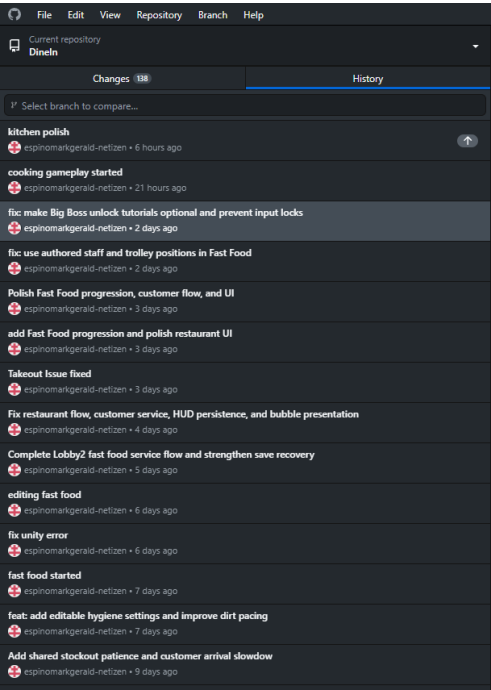

- We built out the Lobby2 Fast Food takeout and service flow and strengthened save recovery.
- We polished restaurant progression, customer flow, HUD, takeout handling, and kitchen visuals.
- We fixed Big Boss tutorial input locks and adjusted Fast Food staff and trolley positions.
- We started hands-on cooking gameplay and continued work on the restaurant, staff models, and face assets.

Mga ipapacheck kay Sir Jiro

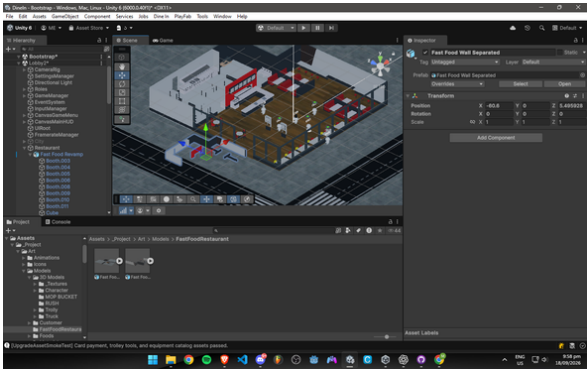

- Casual Dining gameplay and tutorial progression.
- Host and Guest multiplayer service, payment, and shared progress.
- Fast Food customer flow, kitchen cooking, and restaurant progression.
- Local/cloud save and money synchronization.
